

BENEFITS OF CONSUMING A3 SPIRULINA

After a long week of work, A3 Spirulina from Xelliss provides energy and vitality, especially in cases of fatigue. It helps to improve concentration and performance. It is a source of quality protein and essential amino acids. Spirulina powder is rich in antioxidants, which, in addition, promotes overall health and helps to improve performance. It contributes to the formation of red blood cells, thus contributing to the natural formation of red blood cells and hemoglobin, which carry oxygen throughout the body.

THE WORLD OF MICROALGAE AT XELLISS

Xelliss is the world's premier algae production company, leading a worldwide progressive approach. We're continuously growing with the spirit of innovation, we continually invest in new scientific breakthroughs.
